## Volume 26 Author and Subject Index

**A**

ability estimates, 77
analysis of variance (ANOVA), 321
appropriateness measurement, 164
*a*-stratified design, 147, 376
asymptotic standard errors, 239
attitude measurement, 192

**B**

Bayesian hierarchical model, 109
*Béguin, A. A.*, 3
beta binomial, 412
*Bock, R. D.*, 364
*Borsboom, D.*, 433
*Bolt, D. M.*, 339
*Bradlow, E. T.*, 109
*Brennan, R. L.*, 364, 412
*Brooks, G. P.*, 353

**C**

CARS II, 208
*Carstensen, C. H.*, 42
CAT, 393
*Chang, H.-H.*, 147, 376
*Chiu, C. W. T.*, 321
classical test theory, 181
classification accuracy, 412
classification consistency, 412
*Cohen, A. S.*, 25, 339
computer adaptive testing, 164
computer program, 353
computer simulation, 181
computerized adaptive testing, 147, 376
computerized adaptive tests, 57
concurrent calibration, 3, 25
conditional dependence, 364
construct validity, 433
contingency table, 412
crossed-nested-MBIB design, 321
cumulative sum, 164
cutoff scores, 412

**D**

*de Boeck, P.*, 271
decomposition, 393
*de Koning, E.*, 302
deviant items, 181
DIF, 77
differential item functioning, 57, 433
*Dodd, B. G.*, 147
*Donoghue, J. R.*, 192
double monotonicity model, 302
*Drazgow, F.*, 208

**E**

efficiency, 239
*Eggen, T. J. H. M*, 393
EM algorithm, 208
*Emons, W. H. M.*, 88
empirical Bayes methods, 57
equating, 3, 25, 255
expected a posteriori, 192
exposure control, 147

**F**

facet design, 42
*Ferrando, P. J.*, 286
Fisher information function, 393

**G**

generalizability analysis, 364
generalizability theory and method, 321
generalized graded unfolding model, 192
GGUM, 192
Gibbs sampling, 339
goodness-of-fit in IRT, 302
GPCM, 393
graded response model, 25, 181
greedy heuristic, 133

**H**

*Hamers, J. H. M.*, 302
*Hanson, B. A.*, 3, 255, 412

© 2002 Sage Publications

*Hau, K.-T.*, 376
*Hemker, B. T.*, 393

**I**
ideal point, 208
interrater reliability, 321
invariance assumption, 77
IRT, 208
IRT model comparison, 302
IRT scale transformation, 255
item bias, 57, 77, 433
item components, 42
item exposure control, 376
item parameter drift, 77
item parameter estimation, 3
item parameter invariance, 286
item parameter recovery, 339
item pool utilization, 376
item preview, 164
item response analysis, 364
item response models, 164
item response theory linking, 239
item response theory, 3, 25, 77, 88, 109, 164, 181, 192, 255, 271, 286, 339, 412
item selection, 393
item/test response functions, 239
item/test/score information functions, 239

**K**
*Kim, J.-S.*, 255
*Kim, S.-H.*, 25

**L**
large-scale analysis, 321
*Laughlin, J. E.*, 192
law school admission test, 57
*Lee, W.-C.*, 412
*Lee, Y.-S.*, 339
*Leung, C.-K.*, 376
linear approximation, 133
linear logistic test model, 271
linking, 25
loss functions, 57

**M**
Mantel-Haenszel, 57
marginal maximum likelihood estimation, 339
marginal maximum likelihood, 192
Markov chain Monte Carlo, 339
mathematical programming, 133
measurement invariance, 433
*Meijer, R. R.*, 88, 164
*Mellenbergh, G. J.*, 433
*Miller, G. E.*, 355
missing data, 321
model robustness, 181
monotone homogeneity model, 302
multidimensional IRT, 133
multidimensional models, 271
multidimensionality, 42
multilevel models, 271
MULTILOG, 25
multiple-choice model, 255
multiple classifications, 412
multiple ratings of responses, 364
*Muraki, E.*, 364

**N**
nominal response model, 255, 339
nonparametric item response models, 88, 302

**O**
*Ogasawara, H.*, 239
one parameter logistic model, 302
optimal test assembly, 133

**P**
paired comparison, 208
parameter estimation, 192
parametric item response models, 302
*Pastor, D. A.*, 147
performance assessment, 321
performance exercises, 364
person fit, 164
personality measurement, 286
person-fit analysis, 88

polytomous, 164
polytomous items, 147, 393
polytomously scored items, 109

**Q**
quadratic loss function, 255
questionnaire data, 42

**R**
random coefficients models, 271
random data generator, 353
Rasch model, 42, 302
rater design, 321
*Reckase, M. D.*, 131
response aberrance, 88
retest effects, 286
*Rijmen, F.*, 271
*Roberts, J. S.*, 192
*Rost, J.*, 42

**S**
*Sanders, P. F.*, 393
scale development, 181
*Serlin, R. C.*, 77
*Sijtsma, K.*, 88, 302
*Sinar, E. F.*, 181
*Stark, S.*, 208
structural equation models, 286
*Subkoviak, M. J.*, 77
Sympson-Hetter algorithm, 376

**T**
test design, 133
test information, 364
test-overlap control, 376
test security, 147
*Thayer, D. T.*, 57
trait stability, 286

**U**
U3 person fit statistic, 88

**V**
*van Heerden, J.*, 433
*van Krimpen-Stoop, E. M. L. A.*, 164
*van Rijn, P. W.*, 393
variance component, 321
*Veldkamp, B. P.*, 133

**W**
*Wainer, H.*, 109
*Wang, X.*, 109
*Wells, C. S.*, 77
*Wilson, M.*, 228
*Wolfe, E. W.*, 321
*Wollack, J. A.*, 339

**Z**
*Zickar, M. J.*, 181
*Zwick, R.*, 57
